URBAN ELECTRIC MOBILITY

Holistic approach across the urban mobility value chain

Manufacturing

Light connected EVs and removable batteries

- 2-wheeler (motorcycles, mopeds)
- 4-wheeler (quadricycles)
- Removable battery packs (trolleys)
- Battery swapping stations

Recharging solutions

BaaS: Charging services and infrastructure

- BaaS: Battery as a Service
- Installation, operation & maintenance of battery swapping stations
- New uses for batteries (e.g. home battery as energy storage)

Commercialization

Sales and MaaS

- Vehicle sales for private ownership
- MaaS: Mobility as a service. Sharing and rental: B2C, fleets, OEMs

URBAN ELECTRIC MOBILITY

Key growth levers: battery subscription and distribution network

Launch battery subscription model (Battery as a Service – Baas)

- **All vehicles use removable batteries with patented system by Silence**
 - 2- and 4-wheelers share the same standard of batteries and swapping platform
- **BaaS allows the user to subscribe to a battery service** and pay per use (vs buying the battery with the EV):
 - The user charges the battery at home or exchanges it for a recharged battery at a battery station: more efficient than refuelling at a gas station for ICE vehicles, taking just a few seconds
 - Battery stations are 100% autonomous
- **BaaS will accelerate sales for adoption of EVs:**
 - Reducing vehicle acquisition cost by 40%
 - Eliminating uncertainty around charging infrastructure availability
- **Battery station deployment to start in Tier 1 cities in Spain in 2022**, pilot tests started in BCN in 1H-22

Scaling distribution network

- **Clients include:**
 - › B2C through dealers
 - › B2B as sharing, delivery
 - › OEMs like VW group
- **450 dealers in Europe by 2025** (interim target to increase contract signings by 100% in 2022)
- **Online target 50% of sales in 2025**

BaaS and strong dealers network to reach mass market, solving current barriers to EVs adoption (cost & infrastructure availability)

URBAN ELECTRIC MOBILITY

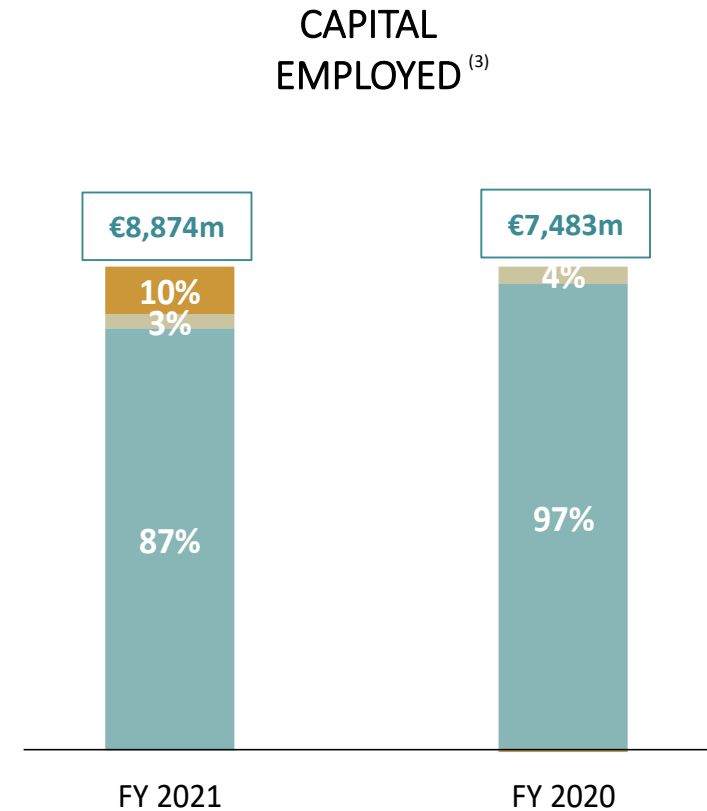

New category “nanocar”: technology, connected & compact size with removable batteries – production to start in H2-22
